

ORMISTON
WIRE SINCE 1793

CATENARY WIRE & ACCESSORIES

Catenary Wire & Accessories

We manufacture and stock a wide range of catenary wire and fittings.

All fittings are galvanised but are also available in stainless steel if required.

The wire is made out of mild steel, specification EN 10257, then heavily galvanised EN 10244 Class A, then 7-stranded to the correct size. You end up with a strong soft strand suitable for use as a catenary wire.

This wire can be used as a support wire to carry electric cables across gaps, as a seizing wire as well as a support wire for trees and masts.

Wire Rope Grips

Code	Size (mm)	Price (each)
GR120	3	£0.34
GR121	5	£0.35
